As an enrolled student at UNSW Canberra, you may be required to engage in face-to-face, online, and blended learning activities and assessment. UNSW Canberra requires all students come prepared with the following computing equipment:

**Computer Hardware:**
Students studying Engineering & Science degrees require a device suitable for the creation of online diagrams, graphing or working. This can be achieved by purchasing a touchscreen laptop, tablet with stylus or peripheral/plug-in graphic drawing tablet, preferably no older than two years.*

Students studying other degrees require a Laptop computer, preferably no older than two years*

Web camera (either built in or plug in)
Headset & Microphone (built in or plug in)
Wi-Fi connectivity highly recommended to support mobile learning

*Students may use a desktop computer at home or in their prescribed accommodation, however a laptop will be required for online assessment.

**Computer Software:**
Program such as the MS suite of Office products to create documents, presentations and spreadsheets. Desktop version of software is preferred over applications as these may slow down operating systems.
UNSW provides students with licenced access to a suite of software including Office 365. Further information at: [https://www.myit.unsw.edu.au/software-students](https://www.myit.unsw.edu.au/software-students)

**Operating system:**
Windows 10 or later, 8 GB RAM minimum
Mac OS X10.13 or above

**Connectivity:**
You will need a reliable high-speed broadband internet connection which will allow you to participate in virtual activities such as online lectures and tutorials, to complete assessments and to engage with learning materials in a variety of formats.*

*Trainee Officers residing in the ADFA live-in-accommodation will be provided with suitable Wi-Fi.
